EDUCATION

Northwestern University

Computer Science, B.S.

Graduating June 2024

Cumulative Major GPA: 3.8/4.0

EXPERIENCE

Software Engineer Intern

Jun 2023 – Sep 2023

Apple

Cupertino, CA

- Designed and developed security systems, APIs, and UIs for Xcode continuous integration services.
- Built an internal access management system for Kubernetes that can be used company-wide.

Software Engineer Intern

Jun 2022 – Aug 2022

Northwestern Mutual

Milwaukee, WI

- Designed solutions for delivery through an enterprise marketing platform involving large-scale email campaign distribution and data management.
- Developed new, complete tools for the company by integrating external packages with internal data using Node.js, MongoDB, and Python.

Undergraduate Teaching Assistant

Mar 2021 – Present

Northwestern University

Evanston, IL

- Instructing students on operating systems, including practices in concurrency, scheduling, device drivers, and virtual memory, through development of a kernel in C.
- Created material and lectured on cloud computing and scalable software topics.
- Holding weekly office hours and grading course assignments.

Founder, President, Software Developer

May 2021 – June 2022

Software and Game Development Group

Evanston, IL

- Maintained management and authentication web systems and applications with various development technologies (Node.js, Express, Git) to connect a group of 200+ aspiring developers to build quality software as a team.

Founder, Software Developer

Sep 2015 – Jul 2020

Voidstone Software

Remote

- Developed quality software—desktop applications, server backend, websites, and game add-ons.
- Established and managed a profitable [online software store](#) by communicating with dozens of customers and bringing ideas into reality with code.

PROJECTS

CRACO | TypeScript, React, Babel, Webpack, Jest, PostCSS, ESLint

May 2022 - Present

- Leading development of a large open-source JavaScript library downloaded about 2 million times per month with around 7,200 stars on GitHub.
- Managing hundreds of issues from developers around the world to ensure that the library is functional, stable, and bug-free.

Paper | TypeScript, Python, React, React DnD, Tailwind CSS, Framer Motion

Nov 2021 - Present

- Created and maintaining a course planning tool used by thousands of students and sponsored by the Northwestern University Department of Computer Science.
- Parsed and storing large amounts of course and user data and implementing feedback-based features and changes.
- Using my custom authentication system to allow users to save their data to their accounts.

Authentication Infrastructure | Node.js, OAuth 2.0, Express, MongoDB, Axios, JWT

Mar 2021 - Present

- Designed a complete user authentication system following the OAuth 2.0 protocol.
- Developed a REST API to allow the client to communicate with the authentication server.
- Using a NoSQL database to store user and configuration data.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Python, C, C++, HTML, CSS, Kotlin, Go, Rust, Swift, SQL

Tools & Frameworks: AWS, DigitalOcean, Git, Unix Shell, Node.js, MongoDB, Kubernetes, React, React Native, Svelte
